

Designed for you, discover the first
cosmetic line directly inspired by
endermologie®

Endermologie®

the science of cellular stimulation,
was invented by LPG in 1986 and has been
validated by more than 85 scientific studies.

Endermologie can only be performed with LPG-patented machines (Cellu M6, Lift M6, Lipo M6 and Wellbox)

The LPG logo consists of the letters 'LPG' in a white, bold, sans-serif font, centered within a dark grey square. The background of the slide features a blue and white wavy pattern that resembles water ripples or a textured surface, with the text overlaid on this pattern.

LPG

worldwide leader of cellular stimulation with the Cellu M6[®], creates for you its 1st Technic Care Line based on Endermologie[®].

The exclusive formulas have **high concentrations of powerful active ingredients**. They're designed to naturally awaken dormant physiological processes, specifically those **responsible for skin aging and localized fat deposits**.

Face treatment

Causes of Skin Aging

The skin is a living organ. Beautiful skin requires cellular activity, as this will naturally maintain its firmness and elasticity. At age 25, cellular activity begins to slow down and the skin loses density. As a result, lines and wrinkles appear, the complexion dulls and skin loses firmness...

Stimulate Youth Cells

LPG experts have developed a groundbreaking new anti-aging treatment. It reduces the visible signs of aging by: stimulating declining cellular activity and protecting skin from external aggressors (U.V., free radicals...).

For optimal anti-aging results,
combine LPG's Technic Care Line
with customized professional
Liftmassage® treatments and with
Wellbox at home.

*In LPG equipped beauty salons.

CELLULAR DEFENSE CREAM

This daytime complex helps protect skin from oxidative stress.

2% OXYLASTIL®

Stimulates cellular oxygenation to restore a radiant complexion.

- Stimulates cellular growth: +58%^[1]

ANTIOXYDANT COCKTAIL

Shields skin from free-radicals and boosts cellular renewal.

- Stimulates cellular renewal: +100%^[2]

UVA-UVB PROTECTION SPF8

Flacon 50 ml - 45 €*
*incl. VAT

PRO-COLLAGEN FIRING CREAM

This professional skincare reactivates natural cellular synthesis that has lasting skin-tightening effects.

3% PEPTIDES

Stimulates cellular division to boost natural collagen production, which is responsible for skin firmness.

- Stimulates collagen neo-synthesis: +50%^[3]

4% ALGISIUM C®

Maintains skin elasticity by fighting collagen fiber glycation (A.G.E.).

- Anti-glycation activity: -78%^[4]

Flacon 50 ml - 55 €*
*incl. VAT

DEEP WRINKLE FILLER SERUM

This concentrated, high-performance serum helps resurface skin to fill-in lines and wrinkles.

5% TENSINE®

Smooths wrinkles and produces a radiant complexion.

- Reduction of wrinkles (quantity and depth) an hour after application^[5]

4% ALGIUM C®

Maintains skin elasticity by fighting collagen fiber glycation (A.G.E.).

- Anti-glycation activity: -78%^[4]

5% PEPTIDES

Stimulates the natural synthesis of collagen and hyaluronic acid to redensify skin.

- Stimulates collagen and hyaluronic acid synthesis: +48%^[3]

Flacon 30 ml - 55 €*

TOTAL EYE CARE

This silky, matifying cream smoothes eye contour, diminishes dark circles and decongests puffy eyes.

2% HALOXYL®

Eliminates toxins responsible for purple under eye circles and boosts microcirculation to decongest baggy eyes.

- Reduces dark circles: 60%^[4]

5% VITANOL®/PEPTIDES

Stimulates collagen production to erase lines and wrinkles.

- Stimulates collagen neo-synthesis: up to +296%^[7]

Flacon 30 ml - 35 €*

[1] SEDERMA in vitro test. - [2] ENGELHARD in vivo test carried out on 15 volunteers during 15 days. - [3] Matrixyl 3000 SEDERMA in vitro test. [4] EXSYMOL in vitro test. - [5] SILAB test by electronic microscope visualization. - [6] SEDERMA test on 22 volunteers. - [7] SILAB in vivo test.

Body treatment

The origins of cellulite

Cellulite is an accumulation of fat cells (adipocytes) under the skin, made visible by the localized orange peel effect (hips, buttocks, and thighs). Cellulite is diet and exercise resistant.

90% of women have cellulite; but which type of cellulite is it?

- **Adipose cellulite** is caused by excess fat. It is dense and compact.
- **Aqueous cellulite** is often associated with circulatory problems. Adipocytes (fat cells) become larger, compress blood vessels, inducing water and toxin retention. It is known as “soft” cellulite.

Stimulate the Slimming Cells

To fight localized fat, LPG experts have designed a unique slimming treatment: intensively stimulate the cellular activity of tissues to restore the body's natural balance.

For optimal slimming results, combine LPG's Technic Care Line with customized professional Lipomassage* treatments and with Wellbox at home.

*In LPG equipped beauty salons.

ADIPOSE CELLULITE RELEASE CREAM

This cream targets localized adipose cellulite to trigger lipolysis (fat elimination).

3% ACTIFIT

Stimulates fat release by transforming excess fatty acids into useable energy.

2.5% GLAUCINE

Prevents the formation of new adipocytes (fat cells) and smoothes skin.

- Stimulates lipolysis: +86.5%
- Reduces the formation of new adipocytes: -93%^[1]

Tube 150 ml - 39 €*
*incl. VAT

AQUEOUS CELLULITE DETOX SERUM

This highly concentrated serum reactivates circulatory exchanges to reduce aqueous cellulite and water retention.

2.5% CAFFEINE/ESCINE

Stimulates venous and lymphatic circulation to release trapped toxins and water.

5% ALGISIUM C®

Oxygenates and detoxifies skin to decongest tissues and boost fat release.

- Stimulates lipolysis: 243%^[2]

Tube 150 ml - 39 €*
*incl. VAT

[1] SEDERMA in vitro test. - [2] EXSYMOL in vitro test. - [3] LETICC test on a panel of 20 self-evaluating volunteers.

[4] SILAB in vivo test. - [5] EXSYMOL test on 10 volunteers after 50 applications by massage of an emulsion containing 5% of Algisium C®.

BODY CONTOURING & FIRMING FLUID

This fluid resculpts the body and tones skin.

5% KIGELINE®

Firms skin and prevents stretch marks.

- Improvement in skin firmness: 55%⁽³⁾
- Improvement in skin elasticity: 70%⁽³⁾

3% TENSINE®

Acts as a girdle by reshaping the body's contours.

- Smoothes and restructures skin's surface an hour after application⁽⁴⁾

3% LIPOSOME

Stimulates fat breakdown.

Tube 150 ml - 39 €*

INCH LOSS BODY CREAM

This refreshing gel releases fatty deposits to slim the figure and resurface skin.

2% CAFFEINE

Stimulates natural lipolysis process to eliminate fatty deposits

A.H.A. (Alpha Hydroxy Acid)

Stimulates cellular regeneration.

1% ALGISIUM C®/GUARANA

Prevents fat deposits.

- Reduction in inches: -1.7 In. (hips) and -1.4 In. (waist)⁽⁵⁾

Tube 150 ml - 39 €*

* Recommended price.
